	Name of cat(s):	Birth Date:
	Date by which sterilisation should be done (6 months old):	

Please Note the new POPI Act Amendment: Excerpt from our POPIA policy document
 Failure to grant consent (including your choice to withhold a copy of your ID and Proof of Residence) will mean:
 1. Your kitten **MUST** be sterilised, fully vaccinated and microchipped before adoption. No exceptions will be made.
 We will not allow unsterilised kittens to be adopted without a reliable way to track the kitten.

Sterilisation Agreement – CatzRus Copy

(To be filled in and signed before adoption if your cat is not already sterilised)

I hereby commit to ensuring that any cats or kittens that I adopt from CatzRus will be sterilised before reaching reproductive maturity (at around six months of age). I understand that any other animals I have should also be sterilised for health and behavioural reasons and to prevent so many unwanted homeless animals.

Should a female reach maturity sooner than expected, and come on heat, I undertake to confine her indoors and get her to the vet for sterilisation as soon as possible before she can become pregnant.

I understand that the cost of sterilisation is included in the adoption fee only if I bring the cat to one of the CatzRus vets, as arranged through the foster parent of my cat.

I undertake to do the following:

- I will contact the foster mom to arrange a vet appointment for my cat at least two weeks before sterilisation is due.
- I will confirm the appointment with the vet and will transport the cat(s) to and from the vet on the day of the operation ***in a secure cat carrier.***
- I will take a photo of the completed sterilisation certificate and will send it to the foster mom after the operation.

I understand that CatzRUs retains the right to remove the cat from my care if I do not comply with these sterilisation requirements. I know that non-sterilisation contributes to the heartache of unwanted pets.

Name & Signature of Adopter: _____	
Witnessed by the CatzRus Foster Parent: _____	
Date: _____	Place: _____

Please note that the 6 month booster vaccinations are not included in the Adoption Package.

*(It makes sense to do post-adoption vaccinations at the time of sterilisation, We do hope adopters will support the vets who are kind enough to offer their professional services to us at rescue rates, but please note that CatzRus does not prescribe that you need to use one of our vets for any post-adoption care that is to your cost. Please talk to the vets about vaccinations and costs **before** sterilisation so that you are not caught unaware by an unexpected vet bill.)*
